

Working sustainably on the transitions

LIOF focuses its activities on an intended positive (indirect) contribution to the following transitions and SDGs: energy, circularity, health and digitalization

Financial results

-2.1
net result
(in millions of €)

114.5
equity
(in millions of €)

Core tasks Innovate & Internationalize

Operational results

203
innovation projects with a project volume of € 29.5 million

14
new business development cases with a project volume of € 10.8 million

9
branches 'From volume to value'

226 projects, cases and branches in total

Impact on SDG's

health

76
projects and activities

affordable and clean energy (energy)

35
projects and activities

innovation (digitalization)

47
projects and activities

circular economy (circularity)

66
projects and activities

224 projects, cases and branches in total*

Core task Invest

Operational results

32
investments with an investment volume of 14.3 million

health

16
investments

affordable and clean energy (energy)

6
investments

innovation (digitalization)

6
investments

circular economy (circularity)

4
investments

All activities impact SDG 8 (growth and jobs).

* The two projects without a direct impact concerns a foreign settler that LIOF reactively supported. The other project concerns the Einstein Telescope. This is an innovation project not specifically aimed at the four transitions but at developing key enabling technologies for the Einstein Telescope. This project thus touches on SDG 8 (growth and jobs).
